

CHURNLENS — EXECUTIVE INTELLIGENCE REPORT

Customer Retention Intelligence, Causal Root Cause Discovery & Financial Risk Model

1. Macro Executive Overview & Revenue Impact

Total Customers Analyzed 10,000 Accounts	Overall Customer Churn Rate 21.39%	Total Monthly Baseline MRR \$1,050,420 / mo
Monthly Revenue Lost to Churn \$228,846 / mo	Annualized Revenue Loss \$2,746,152 / yr	Active Annual Revenue at Risk \$879,120 / yr

2. Customer Segment Churn & Revenue Exposure

While Startup and SMB cohorts display the highest account attrition (23–24%), Enterprise and Mid-Market segments account for over 60.6% of all lost monthly recurring revenue.

Customer Segment	Total Accounts	Churned	Churn Rate (%)	Avg MRR	Lost MRR / Mo	Share of Lost MRR
Enterprise	1,200	188	15.67%	\$392.40	\$73,771.20	32.23%
Mid-Market	2,400	442	18.42%	\$147.00	\$64,974.00	28.39%
SMB	4,400	1,021	23.20%	\$46.50	\$47,476.50	20.75%
Startup / Individual	2,000	488	24.40%	\$36.50	\$17,812.00	7.78%

3. Root Cause Discovery: Causal Drivers vs Visible Symptoms

Traditional analytics observe that churning customers 'log in less frequently'. ChurnLens analyzes the triggers that cause this decay in engagement:

Root Cause Category	Share of Churn	Key Mechanism & Data Evidence	Intervention SLA
Onboarding & Feature Dropoff	41.2%	Non-adoption of core automation in first 14 days causes 38.4% churn	Day 3 In-App Nudge
Involuntary Billing Failure	24.6%	Payment gateway failure without quick retry spikes churn risk to 68.4%	Immediate Automated Dunning
Support Escalation Friction	18.1%	Having >= 2 unresolved tickets increases cancellation rate to 54.6%	4-Hour VIP Escalation
Plan Downgrade Precursor	9.5%	Downgrade events precede complete cancellation within 60 days (82.9%)	24-Hour AE Check-in
Competitor / Natural Attrition	6.6%	Natural market migration and corporate restructuring.	Quarterly EBR

4. What-If Financial Retention Model

Targeting the 660 currently active High & Critical Risk accounts (\$879,120.00 Annual Revenue at Risk) yields the following scenario-based economic returns:

Retention Scenario	High-Risk Accounts Retained	Monthly MRR Preserved	Annual ARR Preserved	Net Economic Value Created
Conservative (5% Retained)	33 Accounts	\$3,663 / mo	\$43,956 / yr	+\$31,956 (After Ops Cost)
Target Benchmark (10% Retained)	66 Accounts	\$7,326 / mo	\$87,912 / yr	+\$63,912 (After Ops Cost)
Optimistic Playbook (20% Retained)	132 Accounts	\$14,652 / mo	\$175,824 / yr	+\$127,824 (After Ops Cost)
